

# Hydrotech News Update, Dec 2014

## New Hydrotech PPG 2600 filter panel

We are proud to present and launch the new PPG (Poly-Propylen Glassfiber) Discfilter panel for our 2600 Discfilter series. This newly developed Discfilter panel is specially manufactured for the Hydrotech Discfilter HSF2600 models.

The new design and material change offers several benefits for our customers and will replace the traditional Stainless Steel frame panels. Filter cloth will be available for purchase in the range of 10-20µm.

Please contact us for more information.

Philip Wassvik, Deputy Sales Director

## Major benefits

- Increased cost-efficiency
- Reduced weight, handling, and freight costs
- User-friendliness
- Decreased carbon footprint
- Reduced Drum wear and tear thanks to reduced weight
- Fail-safe installation thanks to uniform design
- Minimize filtration area loss in case of a cloth rupture, thanks to Intelligent frame structure with two PPG center frame lines
